Funding Opportunity: Secure up to \$1M in funding!

5 hours ago

The Liveability Challenge is back to close the financing gap between the ideas that will make our cities better and the investments that will make these solutions a reality.

Are we consuming our way into extinction by chowing down on planetary boundaries? By 2050, 2.5 billion more people will live in cities, demanding more food, products and conveniences than ever before.

This challenge is looking for the most innovative and ground-breaking solutions in Urban Food Production, Circular Packaging and Decarbonisation.

Temasek Foundation

We are Live!

What's Interseed

Interseed is a digital platform that accelerates sustainability solutions by enabling impact founders to be fund-ready and find talent.

Our Vision

An impact-driven Southeast Asian community with the capacity to tackle evolving sustainability issues.

Our Story

Interseed's core team also founded YSI SEA in 2017.

Over 3 years, YSI SEA's Innovation Programmes incubated 27 regional impact startups. Interacting closely with founders in our programme made us deeply understand the difficulties they face in creating and scaling their sustainability solutions.

Each year, we also receive 1000s of applicants for the programme but we could only select 25 founders.

Interseed was born as a way to reach more impact founders across the region through an online platform and build the capacity of the sustainability sector in the region.
