

SUMMARY

Frontend Software Engineer with a product-design background, building scalable mobile and web applications across React Native, Vue, React, and TypeScript. Experienced in microfrontend architecture, multi-market app delivery (SG & MY), and leveraging AI-Driven Development Lifecycles (AIDLC) to accelerate production-grade engineering.

SKILLS

- React Native
- React
- Vue.js
- TypeScript
- JavaScript (ES6+)
- HTML5 / CSS3
- Tailwind CSS
- Microfrontends
- AIDLC
- Figma

WORK EXPERIENCE

Great Eastern

Frontend Software Engineer

Mar 2026 - Present

- Architected progressive hybrid migration from Cordova/Vue 2.7 to React Native + TypeScript (Hermes), running legacy and modernized flows in tandem with zero user disruption.
- Restructured mobile frontend into a single-repo modular architecture supporting shared component and logic reuse across Singapore (SG) and Malaysia (MY) country builds.
- Piloted AI-assisted developer workflows (Kiro CLI, Amazon Q) across sprint lifecycles to accelerate feature scaffolding, contract verification, and documentation.

Associate Frontend Software Engineer

Aug 2023 - Mar 2026

- Delivered customer-facing insurance features in Vue.js and Cordova, maintaining a 4.8/5 rating across Google Play and Apple App Store for high-traffic policy servicing flows.
- Led frontend development for digital claims as Scrum Master, engineering multi-step document upload and status tracking flows that achieved a 4.8/5 customer satisfaction score.
- Standardized estimation models and cross-functional QA handoffs, cutting squad scope creep by >50% and improving release consistency.

StaffAny

Product Designer

Jan 2022 - Jun 2023

- Designed the 'Learn & Earn' onboarding rewards feature for web and mobile, driving bottom-up product adoption and reaching 48,000+ users within 6 months.
- Overhauled the cross-platform design system in Figma, establishing reusable tokens and component specs that streamlined design-to-engineering handoff.
- Conducted rapid usability testing across 30+ retail managers using UMUX-Lite scoring, validating task completion rates before engineering sprints.

YSI Southeast Asia (Interseed)

Frontend Developer

Sep 2020 - Jun 2021

- Built responsive web features for the Interseed impact platform using React, TypeScript, and React-Bootstrap, ramping up in 2 weeks to deliver production screens.
- Designed Adobe XD prototypes and translated them into accessible web components for founder profiles, resource hubs, and community matchmaking.
- Collaborated with 3 engineers to deliver a soft launch onboarding 300+ regional startup founders and talent.

PROJECTS

Bobo & Bubba Miles Strategy Hub

Aug 2026

Interactive credit card rewards engine and merchant MCC routing matrix built with React, TypeScript, Vite, and Antigravity. (bobobubbamiles.vercel.app)

Tempusu Bot

Mar 2020 - Dec 2021

Telegram bot built with Telegraf.js and MySQL allowing NUS students to set custom daily reminders with direct quick-links to log COVID-19 temperature records, reaching 300+ users and groups.

Tembusu College Orientation Portal (Launchpad)

May 2020 - Aug 2020

Designed and developed an interactive orientation website with JS, Bootstrap, and MySQL for 300+ incoming residents, featuring a real-time collaborative pixel canvas (tPlace).

EDUCATION

National University of Singapore — GPA: 4.97 / 5.00

Aug 2019 - May 2023

BSc (Hons) in Communications and New Media, Minor in Interactive Media Development

Teaching Assistant, UTC2114 Technologies & Ageing in Singapore (Tembusu College)

Aug 2022 - May 2023

Co-designed and delivered seminar workshops on WCAG-aligned accessible UX design and elderly usability testing with faculty.

AWARDS

- NTUC Income Prize, Best Student in NUS Comms & New Media
- NUS Dean's Scholars List, top 1% in FASS cohort, 4 semesters
- NUS Shell Bronze Medal, 3rd Place in FASS cohort, 1 semester

CERTIFICATES

- edX Verified Certificate for HTML5 Coding Essentials and Best Practices
- Nov 2022
- edX Verified Certificate for Creative Coding
- Aug 2022
