

Tan Yi Jia

SUMMARY

Frontend software engineer with a product-design background, building customer-facing mobile and web experiences across React Native, Vue, Cordova, and TypeScript. I have led migration work, shipped app features used by insurance customers, improved delivery quality as a scrum master, and bring a practical eye for systems, usability, and collaboration.

React Native migration
Mobile app delivery
Product-design fluency
Scrum leadership

WORK EXPERIENCE

Frontend Software Engineer

Mar 2026 – Present

Great Eastern

- Leading progressive migration work from Cordova and Vue to React Native, improving load times and development efficiency across the mobile app stack.
- Revamped microfrontend architecture foundations to support multiple country builds and cleaner long-term delivery.
- Partnering across product, QA, and engineering to modernize customer-facing insurance journeys without disrupting active releases.

Associate Frontend Software Engineer

Aug 2023 – Mar 2026

Great Eastern

- Developed features for the Great Eastern mobile application using Cordova and VueJS, contributing to a 4.8 rating on the Google Play Store and App Store.
- Led development of a claims feature as scrum master, helping the team ship a 4.8/5 customer-rated journey after 156 monthly users.
- Reduced scope creep by over 50% through clearer estimation, sprint alignment, and delivery communication.
- Organized two IT department-wide events with 100+ attendees each, strengthening cross-team collaboration.

Product Designer

Jan 2022 – Jun 2023

StaffAny

- Owned growth feature design from research and prototypes through release, with direct collaboration across product, engineering, and go-to-market teams.
- Built high-fidelity Figma prototypes for robust user testing and smoother handoff into development.
- Revamped the design system for consistency and reuse, improving design-team speed and interface quality.
- Conducted user testing with more than 30 users using the UMUX-Lite assessment to validate feature usability.

Frontend Developer

Sep 2020 – Jun 2021

YSI Southeast Asia (Interseed)

- Developed a MERN web application that connected and supported sustainability start-ups through the Interseed platform.
- Designed a landing page prototype in Figma and implemented Wix pages with self-coded CSS and JavaScript elements.
- Collaborated with three developers to support a smooth soft launch to more than 200 users.

PROJECTS

Tempusu Bot

Tempusu College Orientation Website

Developed a Telegram bot using JavaScript and MySQL that helped NUS students set custom COVID-19 temperature-taking reminders. Used by more than 280 students.

Designed and developed an orientation website with Adobe XD, JavaScript, Bootstrap, and MySQL for over 300 incoming residents.

SKILLS

React Native

React

Vue

Cordova

TypeScript

JavaScript

Tailwind

Node.js

SQL

Git

Figma

User testing

EDUCATION

National University of Singapore

Aug 2019 – May 2023

BSc (Hons) in Communications and New Media, Minor in Interactive Media Development (GPA: 4.97 / 5.00)

AWARDS

NTUC Income Prize, Best Student in NUS Communications and New Media

Dean's Scholars List, top 1% in NUS Faculty of Arts and Social Sciences, 4 semesters

Shell Bronze Medal, 3rd Place in NUS Faculty of Arts and Social Sciences, 1 semester

CERTIFICATES

edX Verified Certificate for HTML5 Coding Essentials and Best Practices

Nov 2022

edX Verified Certificate for Creative Coding

Aug 2022

Social and Behavioural Research (Basic/Refresher), CITI Program

Oct 2021 – Oct 2026
